## CERAMICS, COMPOSITES \& CORROSION 1

## MARK SCHEME

Q1.

| Question | Answer | Marks |  |
| :---: | :--- | :---: | :---: |
|  | A It is where thermal decomposition takes place. | $\mathbf{3}$ | 1 |
|  | B It is where only natural substances are mixed. | $\mathbf{2}$ | 1 |
|  | C It is where a natural substance is mixed with a man-made |  | 1 |
|  | substance. | $\mathbf{4}$ | $\mathbf{1}$ |
|  | D It is where limestone is obtained. | 1 |  |
| Total marks |  | 4 |  |

Q2.

| Question | Answer | Extra information | Marks |
| :---: | :---: | :---: | :---: |
| (a) | 3 |  | 1 |
| (b) | 4 |  | 1 |
| (c) | 2 |  | 1 |
| (d) | 3 |  | 1 |
| Total marks |  |  | 4 |

Q3.

| Question | Answer | Extra information | Marks |
| :---: | :---: | :---: | :---: |
| (a) | 3 |  | 1 |
| (b) | 2 |  | 1 |
| (c) | 2 |  | 1 |
| (d) | 2 |  | 1 |
| Total marks |  |  | 4 |

Q4.

| Question | Answer | Extra information | Marks |
| :---: | :---: | :---: | :---: |
| (a) | 2 |  | 1 |
| (b) | 4 |  | 1 |
| (c) | 1 |  | 1 |
| (d) | 3 |  | 1 |
| Total marks |  |  | 4 |

Q5.

| Question | Answer | Extra information | Marks |
| :---: | :--- | :--- | :---: |
| (a)(i) | $2.5(\mathrm{~kg}$ ) | ignore units | 1 |
| (ii) | 40\% (cement) and Test 3 <br> because it is anomalous or <br> because it is much lower than <br> the other two readings | ignore units <br> accept value not used to <br> calculate mean <br> ignore outlier | 1 |
| (iii) | as the percentage of cement <br> increases the mass needed to <br> break the sleeper increases | allow 'strength for 'mass needed' <br> allow correct relationship using <br> percentage of sand | 1 |
| (iv) | volume/percentage / amount <br> of water | accept temperature |  |
| (b) | any two from: <br> availability (of the raw <br> materials) | 1 <br> cost of the raw materials <br> purity (of the raw materials) |  |
| Total marks |  | 2 |  |

Q6.

| Question | Answer | Extra information | Marks |
| :---: | :--- | :--- | :---: |
| (i) | straight line through the first, <br> second and fourth points <br> straight line through the last <br> four points | allow a straight line through the <br> last three points if the first <br> straight line extrapolates below <br> point four | 1 |
| (ii) | repeat the experiment (at each <br> mass of aggregate) <br> (use the results to) calculate a <br> mean/average value (for each <br> mass of aggregate) | do not allow repeat at other <br> masses | 1 |
| (iii) | line drawn to y axis showing <br> extrapolation <br> correct value read from graph | allow +/- one small square <br> do not allow 0 <br> award 1 mark for a value of <br> 34-40 if no extrapolation shown | 1 |
| (iv) | at first, the force needed to <br> break a concrete beam <br> increases | allow values <br> allow at first the statement is <br> correct <br> allow values | 1 |
|  |  | 1 |  |

|  | but the force needed to break <br> a concrete beam then <br> decreases <br> mention of 400 g as the point <br> at which the force needed <br> changes or value from graph | allow 400g if there is no <br> intercept on graph | 1 |
| :---: | :--- | :---: | :---: |
| Total marks |  |  | 9 |
