## COVALENT BONDING 1

## MARK SCHEME

Q1.

| Question | Answer | Extra information | Marks |
| :---: | :---: | :---: | :---: |
|  | 3 bonding pairs <br> 1 lone pair | 1 <br> accept 2 non-bonding electrons <br> on outer shell of nitrogen | 1 |
| Total marks |  |  | 2 |

Q2.

| Question | Answer | Extra information | Marks |
| :---: | :--- | :--- | :---: |
|  | because carbon dioxide is <br> simple molecular / small <br> molecules <br> there are intermolecular <br> forces (between the <br> molecules) <br> $=1$ mark max <br> so a small amount of energy <br> needed (to separate <br> molecules) or (intermolecular <br> forces) are weak | allow intermolecular bonds | 1 |
| Total marks |  | 1 |  |

Q3.

| Question | Answer | Extra information | Marks |
| :---: | :---: | :---: | :---: |
| (a) |  | allow all dots <br> or <br> all crosses <br> or <br> combination <br> or <br> all e / $\mathrm{e}^{-}$ <br> or - <br> or other suitable symbols centre of symbols must be on or inside overlapping areas within reason | 1 |
| (b) | - intermolecular forces / bonds or forces / bonds between molecules <br> - bonds / forces are weak | covalent bonds are weak $=0$ marks if they do not gain either of the marks on the left then allow simple covalent / molecular / made of small molecules for 1 mark | $1$ $1$ |
| Total marks |  |  | 3 |

Q4.

| Question | Answer | Extra information | Marks |
| :---: | :--- | :---: | :---: |
| (a)(i) | share |  | 1 |
| (ii) | covalent |  | 1 |
| (iii) | simple molecules |  | 1 |
| (b) | Water has a boiling point of <br> $100^{\circ} \mathrm{C}$ <br> Water has a melting point <br> lower than room temperature |  | 1 |
| Total marks |  |  | 1 |

Q5.

| Question | Answer | Extra information | Marks |
| :---: | :--- | :--- | :---: |
| (a)(i) | a compound |  | 1 |
| (ii) | $\mathrm{CH}_{4}$ |  | 1 |
| (iii) | covalent |  | 1 |
| (b) | methane has a low boiling <br> point or boiling point less than <br> $20^{\circ} \mathrm{C}$ <br> because it has small molecules | accept it has forces between <br> molecules <br> accept weak forces between <br> molecules for 2 marks | 1 |
| Total marks |  |  |  |

Q6.

| Question | Answer | Extra information | Marks |
| :---: | :---: | :---: | :---: |
| Total marks | A |  | 1 |

Q7.

| Question | Answer | Extra information | Marks |
| :---: | :---: | :---: | :---: |
|  | 2 bonding pairs <br> 2 lone pairs on each oxygen | electrons can be shown as dots, crosses, e or any combination <br> accept 4 electrons within the overlap accept 4 non-bonding electrons on each oxygen | 1 1 |
| Total marks |  |  | 2 |
