## Question 1

| Question | answers | extra information | mark |
| :---: | :---: | :---: | :---: |
| a)i) | protons neutrons | answers may be in either order | 1 |
| a)ii) | 86 | do not accept two fewer protons and neutrons do not accept 218 protons and neutrons | 1 |
| a)iii) | two fewer protons and two fewer <br> neutrons <br> or <br> 84 protons <br> 134 neutrons | do not accept two fewer protons and neutrons do not accept 218 protons and neutrons | 1 |
| b)i) | 0.4 | ```accept 2/5 / accept 40 % for 2 marks allow 1 mark for correct totalling = 1.8 allow 1 mark for a clearly correct method with a clearly incorrect total``` | 2 |

| b)ii) | any one from: <br> पnuclear weapon testing <br> Znuclear power (stations) <br> पnuclear accidents $\quad$ medical | do not accept nuclear accept nuclear/ radioactive waste accept X-rays | 1 |
| :---: | :---: | :---: | :---: |
| c) i) | 2 | accept 2:1 accept twice as big ignore units | 1 |
| c) ii) | No with a reasonable reason explained only going for two weeks so or <br> even staying for a year total exposure well under lowest limit for causing cancer or Yes with a reasonable reason explained all levels of radiation are (potentially) hazardous (1) harm caused by lower doses may not have been recorded(1) <br> or evidence may not be complete <br> or insufficient research into effect of small doses | 1 mark is for a time frame <br> 1 mark is for correctly relating to a dose <br> accept low doses could still cause <br> cancer accept all levels affect you do not accept radiation dose is high(er) do not accept level of background radiation is higher in Germany | 1 1 |

## Question 2

| Question | answers | extra information | mark |
| :--- | :--- | :--- | :--- |
| a) | 146 |  | 1 |
| b) | atomic number | 1 |  |
| c)i) | alpha | number of protons <br> changes | accept atomic number <br> changes <br> accept loses or gains <br> protons |
| do not accept protons <br> with any other <br> particle e.g. number of <br> protons and <br> neutrons changes <br> incorrect <br> do not accept any <br> reference to mass <br> number | 1 |  |  |

## Question 3

| Question | answers | extra information | mark |
| :--- | :--- | :--- | :--- |
| a)i) | K and L | both answers required <br> either order | 1 |
| a)ii) | (1) same number of <br> protons | accept same number |  | 1

|  | (2) different numbers of <br> neutrons | of electrons <br> accept same atomic <br> number | 1 |
| :--- | :--- | :--- | :--- |
| b)i) | 90 |  | 1 |
| b)ii) | 140 | alpha (particle) <br> mass number goes down <br> by 4 <br> or <br> number of protons and <br> neutrons goes <br> down by 4 <br> or <br> number of neutrons goes <br> down by 2 <br> atomic / proton number <br> goes down <br> by 2 <br> or <br> number of protons goes <br> down by 2 | reason may score <br> even if beta or <br> gamma is chosen <br> candidates that <br> answer correctly in <br> terms of why gamma <br> and beta <br> decay are not possible <br> gain full <br> credit <br> accept an alpha <br> particle consists of <br> 2 neutrons and 2 <br> protons for 1 mark <br> accept alpha equals <br> 42He or 42 $\alpha$ for <br> 1 mark <br> an alpha particle is a <br> helium <br> nucleus is insufficient <br> for this mark |

## Question 4

| Question | answers | extra information | mark |
| :--- | :--- | :--- | :--- |
| a) | isotopes | 1 |  |
| b) | 231 <br> $90 ~ T h ~$ (nuclear) fission | correct order only <br> do not accept any <br> spelling that <br> may be confused with <br> fusion | 1 <br> c)i) |
| c)ii) | neutron / neutrons |  |  |
