# Mark Scheme (Results) 

## Summer 2016

Pearson Edexcel GCSE in Chemistry (5CH2H/01) Paper 01<br>Unit C2: Discovering Chemistry

## Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.edexcel.com or www.btec.co.uk. Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus.

## Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: www.pearson.com/uk

## General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- For questions worth more than one mark, the answer column shows how partial credit can be allocated. This has been done by the inclusion of part marks eg (1).
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

## Quality of Written Communication

Questions which involve the writing of continuous prose will expect candidates to:

- Write legibly, with accurate spelling, grammar and punctuation in order to make the meaning clear
- Select and use a form and style of writing appropriate to purpose and to complex subject matter
- Organise information clearly and coherently, using specialist vocabulary when appropriate.

Full marks will be awarded if the candidate has demonstrated the above abilities.
Questions where QWC is likely to be particularly important are indicated (QWC) in the mark scheme, but this does not preclude others.

| Question <br> number | Answer | Notes | Marks |
| :--- | :---: | :--- | :---: |
| $\mathbf{1 ( a ) ( i )}$ | $\mathbf{Z}$ | allow Xe, xenon | $\mathbf{1}$ |

| Question <br> number | Answer | Notes | Marks |
| :--- | :--- | :--- | :---: |
| $\mathbf{1 ( a ) ( \mathbf { i i ) }}$ | E,G,J - all three required <br> OR T,X,Z - all three required | allow correct symbols / names of <br> elements | $\mathbf{1}$ |

| Question <br> number | Answer | Notes | Marks |
| :--- | :--- | :--- | :---: |
| $\mathbf{1 ( b )}$ | C element R |  | $\mathbf{1}$ |

| Question <br> number | Answer | Notes | Marks |
| :--- | :--- | :--- | :---: |
| $\mathbf{1 ( c )}$ | A E and R |  | $\mathbf{1}$ |

| Question number | Answer | Notes | Marks |
| :---: | :---: | :---: | :---: |
| 1(d) | An explanation linking <br> - (delocalised / sea of electrons) electrons (1) <br> - (electrons ) (free to) move / mobile / carry the current (1) <br> $2^{\text {nd }}$ mark dependent on electrons | reject incorrectly qualified electrons ignore metal \{ions/atoms \} / <br> cations <br> reject positive (electrons) / molecules / negative ions / protons move <br> ignore electricity flows | 2 |

| Question <br> number | Answer | Notes | Marks |
| :--- | :--- | :--- | :---: |
| $\mathbf{1 ( \text { e) }}$ | An explanation linking (for <br> element T) any two points from | accept reverse arguments for <br> element E <br> outer (shell) electron further <br> from nucleus / greater <br> shielding (1) | allow T has more shells (1) but <br> ignore T has more outer shells <br> allow comparison between T and E |
| - less attraction between |  |  |  |
| nucleus and electron (1) |  |  |  |
| - electron more easily \{lost / |  |  |  |
| removed \} (1) |  |  |  |$\quad$|  |
| :--- |

| Question <br> number | Answer | Notes | Marks |
| :--- | :--- | :--- | :--- | :---: |
| 2(a) | C 884 yes |  | $\mathbf{1}$ |

| Question <br> number | Answer | Notes | Marks |
| :--- | :---: | :---: | :---: |
| $\mathbf{2 ( b ) ( i )}$ | $\mathbf{C} \quad \mathrm{Na}_{2} \mathrm{SO}_{4}$ |  | $\mathbf{1}$ |

| Question <br> number | Answer | Notes | Marks |
| :--- | :---: | :---: | :---: |
| 2(b)(ii) | D yellow |  | $\mathbf{1}$ |

| Question number | Answer | Notes | Marks |
| :---: | :---: | :---: | :---: |
| 2(b)(iii) | An explanation linking <br> - \{loss of / gives away / transfers\} electron(s) (1) <br> - \{one / an / outer shell\} (electron) (1) <br> M2 dependent on scoring M1 | reject sharing electrons / idea of covalency (0) <br> incorrect reference to protons and/or neutrons max 1 $\mathrm{Na}-\mathrm{e}^{(-)} \rightarrow \mathrm{Na}^{+} \text {(2) }$ | 2 |

| Question number | Answer | Notes | Marks |
| :---: | :---: | :---: | :---: |
| 2(c)(i) | A description including <br> $1^{\text {st }}$ step: <br> - filter / filtration / filtering / use filter paper (1) <br> AND either <br> - wash / rinse (precipitate) ( with water) (1) or <br> - any method of drying (1) <br> M2 dependent on M1 | allow description or diagram of filtering ie funnel and filter paper <br> do not allow sieving / sifting / draining / decanting do not allow separating funnel <br> allow pour water through solid in filter paper <br> allow leave to dry \{on windowsill / in a warm place / in a hot oven etc\} <br> do not allow just 'dry’ | 2 |

| Question number | Answer | Notes | Marks |
| :---: | :---: | :---: | :---: |
| 2(c)(ii) | An explanation linking <br> - \{barium sulfate/it $\}$ \{does not dissolve / is insoluble\} (1) <br> - so it \{cannot enter/cannot mix with/is not absorbed\} into the \{blood(stream)/body\} or it passes through the body (unchanged)/ is egested (1) | ignore 'barium salts' / barium sulfate is a precipitate allow barium is insoluble / does not dissolve (1) <br> allow cannot enter / get into ignore diffuse / cannot be digested <br> allow excreted <br> allow 'barium sulfate does not dissolve into bloodstream' (2) | 2 |

| Question <br> number | Answer | Notes | Marks |
| :--- | :--- | :--- | :---: |
| $\mathbf{3 ( a )}$ | thermometer reading \{falls / <br> decreases\} / condensation on <br> outside of beaker | ignore temperature of surroundings <br> / thermometer gets colder <br> allow temperature \{falls / <br> decreases\} | $\mathbf{1}$ |

| Question number | Answer | Notes | Marks |
| :---: | :---: | :---: | :---: |
| 3(b) | An explanation linking <br> - \{heat / energy\} needed to break bonds / \{heat / energy\} released when bonds formed (1) <br> - more \{heat / energy\} is released than needed (1) <br> M2 dependent on scoring M1 | bond breaking is endothermic / bond making is exothermic <br> ignore numbers of bonds eg more bonds formed than broken <br> if any contradictory statements are made in M1, the mark cannot be awarded (and M2 cannot be awarded either) <br> more energy is released forming bonds than needed to break bonds (2) | 2 |

| Question number | Answer | Notes | Marks |
| :---: | :---: | :---: | :---: |
| 3(c)(i) | $\begin{aligned} & \mathrm{CaCO}_{3}+\mathbf{2} \mathrm{HCl} \rightarrow \mathrm{CaCl}_{2}+ \\ & \mathbf{H}_{\mathbf{2}} \mathbf{O}+\mathbf{C O}_{\mathbf{2}} \end{aligned}$ <br> LHS 2 (1) <br> RHS $\mathbf{C O}_{\mathbf{2}}+\mathbf{H}_{\mathbf{2}} \mathbf{O}$ (either order) (1) | $\begin{aligned} & \text { allow multiples eg } \\ & 2 \mathrm{CaCO}_{3}+\mathbf{4} \mathrm{HCl} \rightarrow 2 \mathrm{CaCl}_{2}+ \\ & 2 \mathbf{H}_{\mathbf{2}} \mathbf{O}+2 \mathbf{C O}_{\mathbf{2}} \end{aligned}$ <br> allow $\mathrm{H}_{2} \mathrm{CO}_{3}$ as only other product <br> reject incorrect subscripts eg $\mathrm{H}^{2} \mathrm{O}$, CO2 <br> reject incorrect cases eg Co reject incorrect balancing numbers on RHS <br> ignore $\mathrm{OH}_{2}$, state symbols | 2 |

| Question number | Answer | Notes | Marks |
| :---: | :---: | :---: | :---: |
| 3(c)(ii) | An explanation linking <br> - (smaller chips =) rate increases / reaction is faster (1) <br> - $\quad$ smaller marble chips = larger surface area or more collisions between reacting particles (1) | allow rate is faster <br> accept 'molecules' or 'ions' but not atoms ignore frequent / chance | 2 |

| Question number | Answer | Notes | Marks |
| :---: | :---: | :---: | :---: |
| 3(c)(iii) | An explanation linking <br> - more particles (in the same volume) (of hydrochloric acid) (1) <br> - more frequent collisions (between hydrochloric acid and marble) <br> or <br> (hydrochloric acid) particles collide more often <br> or <br> higher rate of collisions (between hydrochloric acid and marble) <br> or <br> more collisions (between hydrochloric acid and marble) in given time <br> (1) | accept 'molecules' or 'ions' but not atoms <br> allow (reacting) particles are closer together (1) <br> ignore just 'more <br> ( $\{$ productive/successful/ effective\}) collisions' <br> ignore collisions are more likely <br> ignore greater <br> \{chance/probability\} of collisions <br> ignore particles move faster / <br> faster collisions | 2 |

Total for question 3 = 9 marks

| Question number | Answer | Notes | Marks |
| :---: | :---: | :---: | :---: |
| 4(a)(i) | protons 19 <br> neutrons $\{39-19\}$ or 20 <br> electrons $19(2)$ | any two correct (1) | 2 |

| Question <br> number | Answer | Notes | Marks |
| :--- | :--- | :--- | :---: |
| 4(a)(ii) | A description linking | 2 |  |
|  | protons and neutrons in <br> nucleus (1) <br> electrons in <br> shells/orbitals/energy levels <br> (1) | allow electrons <br> \{surrounding/orbit <br> electrons (move) around outside <br> ignore outer / number of sub- <br> atomic particles |  |

| Question <br> number | Answer | Notes | Marks |
| :--- | :--- | :--- | :---: |
| 4(a)(iii) | 2.8.8.1 (1) | Note : if answer here is blank but <br> electronic configuration is given in <br> (ii), score it here <br> allow correct electron <br> configuration consequential to <br> number of electrons in (i) up to 20 <br> allow electron shell diagram | $\mathbf{1}$ |

| Question <br> number | Answer | Notes | Marks |
| :--- | :--- | :--- | :---: |
| 4(a)(iv) | $1 / 1837$ (1) | allow 1/1800 to 1/2000, 0.0005 <br> -0.00056, negligible,0 <br> ignore 'neg' | $\mathbf{1}$ |

| Question <br> number | Answer | Notes | Marks |
| :--- | :--- | :--- | :---: |
| 4(b)(i) | C same number of protons but <br> different numbers of neutrons |  | $\mathbf{1}$ |

| Question number | Answer | Notes | Marks |
| :---: | :---: | :---: | :---: |
| 4(b)(ii) | total mass of Ga-69 atoms $60.2 \times 69(1)=4153.8$ <br> total mass of Ga-71 atoms $39.8 \times 71$ (1) $=2825.8$ calculate relative atomic mass $\frac{4153.8+2825.8}{100}(1)(=69.8)$ | check working first - if <br> approximated to $60 \%$ and $40 \%$ or similar initial rounding - max (2) <br> 4153.8 alone (1) <br> 2825.8 alone (1) <br> also percentage route <br> $60.2 \times \underline{69}=41.538 / 41.54 / 41.5$ <br> (1) <br> 100 $39.8 \times \underline{71}=28.258 / 28.26 / 28.3$ <br> (1) <br> 100 <br> allow TE for third mark <br> 69.796 or 69.8 alone (3) $=69.7$ (2) (rounding error) <br> ignore 70 as answer <br> 70 alone with no working scores 0 | 3 |

Total for question 4 = $\mathbf{1 0}$ marks

| Question <br> number | Answer | Notes | Marks |
| :--- | :--- | :--- | :---: |
| $\mathbf{5 ( a ) ( i )}$ | An explanation linking | $\mathbf{2}$ |  |
|  | • shared electron(s) (1) | any mention of ions / electron <br> transfer (from one atom to <br> another) scores 0 |  |
| $2^{\text {nd }}$ mark dependent on 1 ${ }^{\text {st }}$ |  |  |  |$\quad$|  |
| :--- |

| Question number | Answer | Notes | Marks |
| :---: | :---: | :---: | :---: |
| 5(a)(ii) | Diagram showing one phosphorus and three chlorine atoms eg <br> - three pairs of electrons shared between the phosphorus and chlorine atoms (1) <br> - fully correct (1) | allow use of dots or crosses or mixture of both do not allow $\mathrm{PCl}_{5}$ <br> non-bonding electrons do not have to be in pairs <br> circles do not need to be shown / ignore circles <br> ignore inner shells even if incorrect <br> ignore symbols even if incorrect or missing | 2 |

| Question <br> number | Answer | Notes | Marks |
| :--- | :--- | :--- | :---: |
| $\mathbf{5 ( a ) ( \text { iii) }}$ | $2 \mathrm{Al}+3 \mathrm{Cl}_{2} \rightarrow 2 \mathrm{AlCl}_{3}$ (2) | allow multiples |  |
| correct formulae (1) |  |  |  |
|  | balloncing of correct formulae <br> (1) | ignore state symbols / word <br> equations <br> reject incorrect subscripts eg Cl2, <br> $\mathrm{Cl}^{2} /$ incorrect case | $\mathbf{2}$ |

| Question number |  | I ndicative content | Mark |
| :---: | :---: | :---: | :---: |
| QWC | *5(b) | An explanation including some of the following points <br> chlorine <br> - weak intermolecular forces / weak forces between molecules <br> - requires little energy <br> - to separate molecules <br> diamond <br> - strong covalent bonds between all atoms <br> - each atom bonded to four carbon atoms <br> - requires lots of energy <br> - to break all bonds / separate atoms <br> sodium chloride <br> - electrostatic forces of attraction between oppositely charged ions <br> - giant ionic lattice <br> - requires lots of energy <br> - to separate ions <br> zinc <br> - electrostatic forces of attraction between oppositely charged metal ions and delocalised electrons <br> - giant (metallic) lattice <br> - requires lots of energy <br> - to separate metal ions <br> solubility <br> - diamond does not dissolve <br> - sodium chloride dissolves in water <br> - water separates ions of sodium chloride / group 1 salts are soluble <br> - water does not separate the atoms in diamond | (6) |
| Level | 0 | No rewardable content |  |
| 1 | 1-2 | - a limited explanation e.g. explains link between bonding between pa and melting point for one substance OR explains solubility of diamond sodium chloride <br> - the answer communicates ideas using simple language and uses lim scientific terminology <br> - spelling, punctuation and grammar are used with limited accuracy | icles or d |
| 2 | 3-4 | - a simple explanation e.g. explains link between bonding between pa and melting point for more than one substance OR explains solubility diamond and sodium chloride OR explains link between bonding bet particles and melting point for one substance and explains solubility diamond or sodium chloride <br> - the answer communicates ideas showing some evidence of clarity and organisation and uses scientific terminology appropriately <br> - spelling, punctuation and grammar are used with some accuracy | icles of een f |

| 3 | 5-6 | -a detailed explanation e.g. explains link between bonding between <br> particles and melting point for more than two substances OR explains link <br> between bonding between particles and melting point for one substance <br> and explains solubility of diamond and sodium chloride OR explains link <br> between bonding between particles and melting point for more than one <br> substance and explains solubility of diamond or sodium chloride <br> $\quad$vane answer communicates ideas clearly and coherently uses a range of <br> thentific terminology accurately <br> spelling, punctuation and grammar are used with few errors |
| :--- | :--- | :--- |

Total for question 5 = 12 marks

| Question number | Answer | Notes | Marks |
| :---: | :---: | :---: | :---: |
| 6(a) | $\begin{aligned} & \text { rel formula mass } \mathrm{NH}_{4} \mathrm{NO}_{3}=(2 \times 14)+ \\ & (4 \times 1)+(3 \times 16)(\mathbf{1}) \\ & (=80) \\ & \frac{(2 \times 14) \text { or } 28(\mathbf{1})}{\times 100(\mathbf{1 )}(=35 \%)} \\ & \text { rel formula mass } \mathrm{NH}_{4} \mathrm{NO}_{3} \text { (from above) } \end{aligned}$ | 80 alone (1) <br> allow TE for rel formula mass <br> credit ( $2 \times 14$ ) or 28 only in numerator of $\%$ calculation <br> $35 \%$ alone (3) <br> common errors include <br> 17.5\% (2) <br> 22.4\% (2) - mp 3 incorrect 70\% (2) <br> allow <br> $33 \%$ (1) (atomic numbers used in place of relative atomic masses) | 3 |

| Question number | Answer | Notes | Marks |
| :---: | :---: | :---: | :---: |
| 6(b) | ```190 tonnes TiCl4 tonnes Ti (1) 500 tonnes TiCl4 500 (1) 190 (= 126.3 / 126) tonnes Ti``` | first mark - 190, 48 may be given under the equation <br> allow any number of sig figs allow 126/126.3 alone (2) <br> common errors include $\begin{aligned} & \frac{190}{48} \times 500=1979.17 / 1979.2 / 1980 \\ & \text { early rounding } \\ & \frac{48}{190}=0.25 \quad 0.25 \times 500=125 \end{aligned}$ <br> allow calculation using moles $\underline{500}\left(x 10^{6}\right)$ moles $\mathrm{TiCl}_{4} \rightarrow \underline{500\left(x 10^{6}\right)}$ moles Ti 190190 $\left(=2.63\left(\times 10^{6}\right)\right.$ <br> (1) $\text { mass } \mathrm{Ti}=2.63\left(\times 10^{6}\right) \times 48$ <br> (1) $=126.3 / 126$ <br> (tonnes) | 2 |

| Question <br> number | Answer | Notes | Mark |
| :--- | :--- | :--- | :---: |
| $\mathbf{6 ( c )}$ | any one of <br> - waste product needs to be <br> separated (cost, means, product <br> not pure, energy cost) | lignore <br> reduces atom economy / waste <br> means less than $100 \%$ yield / <br> maste product may not be <br> commercially useful / effect on <br> profit | waste /efficiency / side <br> reactions |
| -waste product can present <br> problems for disposal (cost, <br> hazardous nature - any <br> acceptable eg harmful, toxic, <br> effect on environment, storage of <br> waste product, effect on landfill) | 1 |  |  |

| Quest numb |  | Indicative content | Mark |
| :---: | :---: | :---: | :---: |
| QWC | *6(d) | An explanation including some of the following points <br> experimental method <br> - find mass of crucible / suitable container (+ lid) <br> - find mass of container (+ lid) + magnesium <br> - heat container (+lid) + magnesium <br> - lift lid occasionally to allow oxygen in <br> - minimise loss of magnesium oxide <br> - heat until no further change <br> - (credit 'add water and heat' as this removes any magnesium nitride formed) <br> - allow to cool <br> - find mass of container (+ lid) + magnesium oxide <br> - repeat heating <br> - until constant mass <br> calculation <br> - mass magnesium $=$ [mass of container (+ lid) + magnesium $]$ - [mass of container (+ lid)] <br> - mass magnesium oxide $=$ [mass of container $(+$ lid) + magnesium oxide] - [mass of container (+ lid)] <br> - mass of oxygen = mass of magnesium oxide - mass of magnesium $=0.700-0.420$ <br> - mass of oxygen $=0.280 \mathrm{~g}$ <br> - ratio magnesium atoms $=\frac{0.420}{24}=0.0175$ <br> - to oxygen atoms $=\frac{0.280}{16}=0.0175$ |  |

|  |  | - ratio magnesium atoms : oxygen atoms $=1: 1$ <br> - empirical formula MgO |
| :---: | :---: | :---: |
| Level | 0 | No rewardable content |
| 1 | 1-2 | - a limited description e.g. burn magnesium to form magnesium oxide OR finds mass of oxygen from results OR attempts calculation <br> - the answer communicates ideas using simple language and uses limited scientific terminology <br> - spelling, punctuation and grammar are used with limited accuracy |
| 2 | 3-4 | - a simple description e.g. gives a brief experimental method and attempts calculation OR gives a complete experimental method OR calculates empirical formula <br> - the answer communicates ideas showing some evidence of clarity and organisation and uses scientific terminology appropriately <br> - spelling, punctuation and grammar are used with some accuracy |
| 3 | 5-6 | - a detailed description e.g. gives a brief experimental method and calculates empirical formula OR gives a complete experimental method and attempts calculation <br> - The answer communicates ideas clearly and coherently uses a range of scientific terminology accurately <br> - spelling, punctuation and grammar are used with few errors |
