##  <br> Pearson

# Mark Scheme (Results) 

January 2018

Pearson Edexcel GCSE
In Chemistry (5CH2F)
Paper 01

## Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.edexcel.com or www.btec.co.uk. Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus.

## Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: www.pearson.com/uk

## General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

| Question <br> number | Answer | Notes | Marks |
| :--- | :---: | :---: | :---: |
| $\mathbf{1 ( a ) ( i )}$ | R |  | 1 |

| Question <br> number | Answer | Notes | Marks |
| :--- | :--- | :---: | :---: |
| 1 (a)(ii) | D are malleable |  | 1 |

| Question <br> number | Answer | Notes | Marks |
| :--- | :--- | :--- | :---: |
| $\mathbf{1 ( b ) ( \mathbf { i } )}$ | (chlorine - ) yellow-green (1) <br> (bromine - ) liquid / l (1) <br> (iodine - ) solid /s (1) | accept green-yellow / green <br> ignore yellow alone | 3 |

| Question <br> number | Answer | Notes | Marks |
| :--- | :---: | :---: | :---: |
| 1(b)(ii) | D simple molecular, covalent |  | 1 |

| Question <br> number | Answer | Notes | Marks |
| :--- | :--- | :--- | :---: |
| $\mathbf{1 ( c ) ( i )}$ | density allow any number 1.41 to 3.51 (1) |  | $\mathbf{2}$ |
|  | boiling point allow any number -185 to -109 (1) |  |  |

| Question <br> number | Answer | Notes | Marks |
| :--- | :--- | :---: | :---: |
| 1(c)(ii) | (helium is) non-flammable / inert / unreactive <br> / ORA |  | 1 |

| Question <br> number | Answer | Notes | Marks |
| :--- | :---: | :---: | :---: | :---: |
| 2(a) | B 3 |  | 1 |

| Question <br> number | Answer | Notes | Marks |
| :--- | :--- | :--- | :---: |
| 2(c) | A description including |  | 2 |
|  | protons and neutrons in the nucleus (1) <br> electrons in shells (around the nucleus) (1) |  |  |

| Question <br> number | Answer | Notes | Marks |
| :--- | :---: | :---: | :---: |
| 2(d)(i) | B 6 |  | 1 |

| Question number | Answer | Notes | Marks |
| :---: | :---: | :---: | :---: |
| 2(d)(ii) | An explanation linking <br> EITHER <br> - (beryllium atoms have) 2 electrons (1) <br> - in outer (electron) shell (1) <br> OR <br> - number of outer shell electrons (1) <br> - is the group number (of the periodic table)(1) |  | 2 |

Total for Question 2 = 8 marks

| Question <br> number | Answer | Notes | Marks |
| :--- | :--- | :--- | :---: |
| $\mathbf{3 ( a )}$ | An explanation linking |  | $\mathbf{2}$ |
| ink spots below solvent level / solvent <br> level above ink spots (1) <br> inks dissolve into solvent / inks do not <br> move with solvent (1) | allow ORA |  |  |

| Question <br> number | Answer | Notes | Marks |
| :--- | :--- | :--- | :---: |
| 3(b)(i) | An explanation linking |  | 2 |
|  | • ink Z (1) <br> e has four spots (on chromatogram) / the <br> others have fewer (1) |  |  |

| Question <br> number | Answer | Notes | Marks |
| :--- | :--- | :--- | :---: |
| 3(b)(ii) | (distance moved by dye) $=3$ to 3.5 <br> and <br> (distance moved by solvent) $=8 \quad(1)$ <br> 3 to $3.5 / 8=(0.375$ to 0.4375$)(1)$ | 2 |  |
|  |  |  |  |

| Question number | Answer | Notes | Marks |
| :---: | :---: | :---: | :---: |
| 3(c) | $H\left(\begin{array}{c} H  \tag{2}\\ x_{0} \\ C \\ x_{0} \\ H \end{array}\right) H$ | one shared pair (1) remaining three shared pairs (1) <br> use of any non-shared electrons on $\mathrm{H}(\max 1)$ <br> allow use of dots or crosses or mixture of both | 2 |

| Question number | Answer | Notes | Marks |
| :---: | :---: | :---: | :---: |
| 3(d) | An explanation linking <br> - strong (covalent) bonds / large number of bonds (1) <br> - large amount of heat / energy (needed to break bonds) (1) | allow lattice <br> allow bonds hard to break ignore high temperature needed | 2 |

Total for Question 3 = 10 marks

| Question <br> number | Answer | Notes | Marks |
| :--- | :---: | :---: | :---: |
| 4(a) | $\mathrm{CuCl}_{2}+\mathbf{2} \mathrm{KOH} \rightarrow \mathrm{Cu}(\mathrm{OH})_{2}+\mathbf{2} \mathrm{KCl}$ |  | $\mathbf{2}$ |

| Question <br> number | Answer | Notes | Marks |  |
| :--- | :---: | :---: | :---: | :---: |
| 4(b) | C 97.5 |  |  | 1 |

| Question <br> number | Answer | Notes | Marks |
| :--- | :--- | :--- | :---: |
| 4(c) | $\frac{39.0}{74.5}(1)$ | $0.52(1)$ | 2 |
|  | their fraction $\times 100(1)$ |  |  |
|  |  | Allow two marks for $52 / 52.5 / 52.35 \%$ |  |

| Question <br> number | Answer | Notes | Marks |
| :--- | :--- | :--- | :---: |
| 4(d) | $\frac{3.6}{4.0}(1)$ | $0.9(1)$ | $\mathbf{2}$ |
|  | correct answer alone scores 2 marks |  |  |

| Question <br> number | Answer | Notes | Marks |
| :--- | :---: | :--- | :---: |
| 4(e) | any two from |  | 2 |
|  | • practical losses during experiment(1) <br> • incomplete reactions (1) <br> • side reactions (1) |  |  |

Total for Question 4 = 9 marks

| Question <br> number | Answer | Notes | Marks |
| :--- | :--- | :--- | :---: |
| 5(a)(i) | magnesium + hydrochloric acid $\rightarrow$ magnesium chloride + hydrogen |  | 2 |
|  | LHS (1) <br> RHS (1) |  |  |

| Question <br> number | Answer | Notes | Marks |
| :--- | :---: | :--- | :---: |
| 5(a)(ii) | $\mathrm{H}_{2}$ | do not allow h, H2, H ${ }^{2}$ etc. | 1 |

| Question <br> number | Answer | Notes | Marks |
| :--- | :--- | :--- | :---: |
| 5(a)(iii) | B |  | 1 |

| Question <br> number | Answer | Notes | Marks |
| :--- | :--- | :--- | :---: |
| 5(b) | A description including two of the following <br> use thermometer (1) <br> measure temperature \{before and <br> after/change/during the reaction\} (1) <br> temperature rises (1) | use hand (1) <br> feel it getting hotter (1) | $\mathbf{2}$ |

| Quest numb | ion | Indicative content | Mark |
| :---: | :---: | :---: | :---: |
| QWC | *5c | A description to include some of the following points Experiment <br> - measure volume of acid/stated volume <br> - measure \{length / mass\} of magnesium / stated \{length / mass\} <br> - add magnesium to acid in conical flask <br> - collect the hydrogen in a gas syringe <br> - measure \{amount/volume\} of hydrogen <br> - time/measure how long the reaction takes <br> - fixed volume of hydrogen / fixed time <br> - repeat experiment again <br> - same volume of acid <br> - same \{length / mass / surface area\} of magnesium <br> - same temperature <br> - different concentration <br> Results <br> - (with a higher concentration) same volume of hydrogen in shorter time / in the same time larger volume of hydrogen formed <br> - the higher the concentration of the acid the higher the rate of reaction / the faster the reaction | 6 |
| $\begin{aligned} & \text { Leve } \\ & \text { l } \end{aligned}$ | 0 | No rewardable content |  |
| 1 | 1-2 | - a limited description e.g. add same volume of acid of different concentration to magnesium <br> - the answer communicates ideas using simple language and uses limited scientific terminology <br> - spelling, punctuation and grammar are used with limited accuracy |  |
| 2 | 3-4 | - a simple description e.g. add same volume of different concentration of acids to same amount of magnesium, measure volume of gas <br> - the answer communicates ideas showing some evidence of clarity and organisation and uses scientific terminology appropriately <br> - spelling, punctuation and grammar are used with some accuracy |  |
| 3 | 5-6 | - a detailed description e.g. add same volume of different concentration of acids to same amount of magnesium, measure volume of gas, larger volume of gas should be produced in same amount of time with the more concentrated acid <br> - The answer communicates ideas clearly and coherently uses a range of scientific terminology accurately <br> - spelling, punctuation and grammar are used with few errors |  |

Total for Question 5 = 12 marks

| Question <br> number | Answer | Notes | Marks |
| :--- | :--- | :--- | :---: |
| $\mathbf{6 ( a )}$ | $\mathrm{K}_{2} \mathrm{SO}_{4}$ | reject lower case s or o <br> reject incorrect subscripts eg K2, K ${ }^{2}$ etc. | $\mathbf{1}$ |

| Question <br> number | Answer | Notes | Marks |
| :--- | :--- | :--- | :---: |
| 6(b) | B lilac |  | 1 |

| Question <br> number | Answer | Notes | Marks |
| :--- | :--- | :--- | :---: | :---: |
| 6(c)(i) | sodium <br> carbonate | calcium $\rightarrow$ calcium |  |
| nitrate |  |  |  |
| carbonate | sodium <br> nitrate <br> $(2)$ | left hand side (1) <br> right hand side (1) | 2 |

| Question <br> number | Answer | Notes | Marks |
| :--- | :--- | :--- | :---: |
| 6(c)(ii) | A description to include |  | $\mathbf{2}$ |
|  | add (dilute hydrochloric) acid to / heat <br> (solid) (1) <br> gas given off turns limewater \{cloudy / <br> milky\} (1) |  |  |

| Question number |  | Indicative content | Mark |
| :---: | :---: | :---: | :---: |
| QWC | *6(c)(iii) | A description including some of the following points reactants <br> - dissolve sodium carbonate in water <br> - dissolve calcium nitrate in water <br> - use of appropriate apparatus <br> - add one solution to the other <br> - stir / mix <br> separate product <br> - filter <br> - use of filter paper and funnel <br> making pure, dry salt <br> - solid on filter paper <br> - wash with water <br> - use of distilled / deionised water <br> - dry in warm oven / leave to dry / in a warm place | 6 |
| Level | 0 | No rewardable content |  |
| 1 | 1-2 | - a limited description e.g. mix solutions of the reactants in a beaker <br> - the answer communicates ideas using simple language and uses limited scientific terminology <br> - spelling, punctuation and grammar are used with limited accuracy |  |
| 2 | 3-4 | - a simple description e.g. mix solutions of the reactants in a beaker and then filter solid <br> - the answer communicates ideas showing some evidence of clarity and organisation uses scientific terminology appropriately <br> - spelling, punctuation and grammar are used with some accuracy | off the <br> and |
| 3 | 5-6 | - a detailed description e.g. mix solutions of the reactants in a beaker then filter of solid, wash solid and leave to dry in a warm place <br> - The answer communicates ideas clearly and coherently uses a range of scientific terminology accurately <br> - spelling, punctuation and grammar are used with few errors | ff the |

Total for Question $6=12$ marks
