## GCSE

## WJEC CBAC

## 4370/06

## MATHEMATICS - LINEAR <br> PAPER 2 <br> HIGHER TIER

A.M. MONDAY, 10 November 2014

2 hours

## ADDITIONAL MATERIALS

A calculator will be required for this paper.
A ruler, a protractor and a pair of compasses may be required.

## INSTRUCTIONS TO CANDIDATES

Use black ink or black ball-point pen.
Write your name, centre number and candidate number in the spaces at the top of this page.
Answer all the questions in the spaces provided.
Take $\pi$ as $3 \cdot 14$ or use the $\pi$ button on your calculator.

## INFORMATION FOR CANDIDATES

You should give details of your method of solution when appropriate.
Unless stated, diagrams are not drawn to scale.
Scale drawing solutions will not be acceptable where you are asked to calculate.
The number of marks is given in brackets at the end of each

| For Examiner's use only |  |  |
| :---: | :---: | :---: |
| Question | Maximum <br> Mark | Mark <br> Awarded |
| 1. | 3 |  |
| 2. | 8 |  |
| 3. | 10 |  |
| 4. | 4 |  |
| 5. | 4 |  |
| 6. | 6 |  |
| 7. | 4 |  |
| 8. | 9 |  |
| 9. | 11 |  |
| 10. | 6 |  |
| 11. | 9 |  |

| 13. | 8 |  |
| 14. | 5 |  |
| 15. | 4 |  |
| 16. | 5 |  |
| Total | 100 |  | question or part-question.

You are reminded that assessment will take into account the quality of written communication (including mathematical communication) used in your answer to question 3.

## Formula List

Area of trapezium $=\frac{1}{2}(a+b) h$

Volume of prism $=$ area of cross-section $\times$ length

Volume of sphere $=\frac{4}{3} \pi r^{3}$
Surface area of sphere $=4 \pi r^{2}$

Volume of cone $=\frac{1}{3} \pi r^{2} h$
Curved surface area of cone $=\pi r l$

In any triangle $A B C$
Sine rule $\frac{a}{\sin A}=\frac{b}{\sin B}=\frac{c}{\sin C}$
Cosine rule $a^{2}=b^{2}+c^{2}-2 b c \cos A$
Area of triangle $=\frac{1}{2} a b \sin C$

## The Quadratic Equation

The solutions of $a x^{2}+b x+c=0$
where $a \neq 0$ are given by

$$
x=\frac{-b \pm \sqrt{\left(b^{2}-4 a c\right)}}{2 a}
$$

1. The total mass of peaches, in kg, produced by each of 200 trees was measured.

The table shows the grouped frequency distribution for the masses of peaches from these 200 trees.

| Mass of <br> peaches, $x \mathrm{~kg}$ | $0<x \leqslant 5$ | $5<x \leqslant 10$ | $10<x \leqslant 15$ | $15<x \leqslant 20$ | $20<x \leqslant 25$ |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Number of <br> trees | 4 | 6 | 82 | 76 | 32 |

(a) On the graph paper below, draw a grouped frequency diagram to show this data.

(b) State which class interval contains the median.
2. In an experiment, values of $x$ and $y$ are recorded to look for a possible relationship. The table below shows the results.

| $x$ | 20 | 36 | 44 | 22 | 38 | 40 | 48 | 8 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $y$ | 16 | 32 | 40 | 20 | 34 | 32 | 44 | 6 |

(a) On the grid below, draw a scatter diagram to show the results.

(b) The mean of the $x$ values is 32 .
Calculate the mean of the $y$ values and then draw a line of best fit on your scatter
diagram.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
(c) What type of correlation does your scatter diagram show?
(d) Using your line of best fit, find an approximate value of $y$ when $x$ is 25 .
$\qquad$
3. You will be assessed on the quality of your written communication in this question.

Radiators are used to heat rooms.

Guidance from the internet for calculating the size of radiator needed to heat a room is as follows.

- Calculate the volume of the room in $\mathrm{m}^{3}$.
- Allow 50 watts per $1 \mathrm{~m}^{3}$.
- Check if the window area is greater than $3 \mathrm{~m}^{2}$; if so, increase the total number of watts by $11 \%$.
- One watt multiplied by 3.412 gives a measure in British thermal units (Btu). (A Btu is a measure of the amount of heat produced.)

The company Dragon Radiators sells 4 sizes of radiator, as listed below.

| Radiator | British thermal units (Btu) |
| :---: | :---: |
| Mini | 35000 Btu |
| Small | 40000 Btu |
| Standard | 45000 Btu |
| Super | 50000 Btu |

Griff's sitting room has height 2.4 m , length 12 m and width 8 m .
The sitting room has one window that measures 1.7 m by 1.8 m .
He wants to buy one radiator sufficient to heat his sitting room.
Which radiator would you suggest that Griff buys from Dragon Radiators?
You must show all your working and give a reason for your answer.

Examiner
5. (a) Decrease 7800 metres by $23 \%$.

$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
(b) Tomos and Rita share £27 in the ratio 1:8. Calculate Rita's share of the money.
$\qquad$
$\qquad$
$\qquad$
6. (a) The $n$th term of a sequence is $3 n^{2}-25$.

Evaluate the 40th term of the sequence.
$\qquad$
$\qquad$
(b) Write down the $n$th term of the following sequences.
(i) $7,19,31,43,55,67, \ldots$.
(ii) $48,46,44,42,40, \ldots$

(b) The fuel consumption of Gwen's car depends on its speed.

At an average speed of 50 mph , the car travels a distance of 44 miles per gallon. At an average speed of 60 mph , the car travels a distance of 38 miles per gallon.

The fuel for Gwen’s car costs $£ 1.56$ per litre.
1 litre is approximately equal to 0.219 gallons.
Gwen drives the 170 miles from Lancaster to Glasgow.
Calculate the saving Gwen would make if she reduced her average speed from 60 mph to 50 mph .
You must show all your working.
9. An 'e-reader' is an electronic book.

(a) The screen of the e-reader measures 152 mm by 102 mm , with measurements given correct to the nearest mm .
Calculate the greatest possible area of the screen.
Give the units of your answer.
(b) Guinevere has carried out a survey by recording the number of pages in each of her 70 paperback books.
Her results are shown below.

| Number of pages, $p$ | Number of books |
| :---: | :---: |
| $1 \leqslant p \leqslant 100$ | 2 |
| $101 \leqslant p \leqslant 200$ | 6 |
| $201 \leqslant p \leqslant 300$ | 16 |
| $301 \leqslant p \leqslant 400$ | 34 |
| $401 \leqslant p \leqslant 500$ | 12 |

(i) Calculate an estimate for the mean number of pages per paperback book.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
(ii) Guinevere has bought an e-reader.

Her e-reader can store the equivalent of 1100 books.
Calculate an estimate for the number of pages stored by Guinevere's e-reader.
Give your answer in standard form.

11. (a) Solve the following simultaneous equations using an algebraic method.

$$
\begin{aligned}
6 x+5 y & =33 \\
10 x-3 y & =-13
\end{aligned}
$$

(b) Rearrange the following to make $h$ the subject of the formula.

$$
p=\frac{3 h}{f}+g
$$

(c) Rearrange the following to make $x$ the subject of the formula.

$$
A=\sqrt{x y}
$$

12. Tara has two similar star badges, as shown below. The front of each badge is coated in gold paint.

Diagram not drawn to scale

The value of the gold paint on the larger star badge is $£ 18.55$.
Calculate the value of the gold paint on the smaller star badge.
You must show all your working.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
13. The diagram shows two rectangles joined together.

The total area of the two rectangles is $212.5 \mathrm{~cm}^{2}$. By using an algebraic method, calculate the area of the smaller rectangle.

15. Ceri plays in a hockey team.

The hockey team's training sessions are run by one of two different coaches, Meg or Lotti. Meg is the coach for $70 \%$ of the training sessions.

Ceri likes to play as goal-keeper for the team.
When Meg coaches the hockey team, the probability that Ceri is the goal-keeper is $0 \cdot 4$. When Lotti coaches the hockey team, the probability that Ceri is the goal-keeper is 0.9 .

Calculate the probability that Ceri will not be the goal-keeper at the hockey team's next training session.
