## GCSE MARKING SCHEME

SUMMER 2019

GCSE
MATHEMATICS - UNIT 2 (INTERMEDIATE TIER)
3300U40-1

## INTRODUCTION

This marking scheme was used by WJEC for the 2019 examination. It was finalised after detailed discussion at examiners' conferences by all the examiners involved in the assessment. The conference was held shortly after the paper was taken so that reference could be made to the full range of candidates' responses, with photocopied scripts forming the basis of discussion. The aim of the conference was to ensure that the marking scheme was interpreted and applied in the same way by all examiners.

It is hoped that this information will be of assistance to centres but it is recognised at the same time that, without the benefit of participation in the examiners' conference, teachers may have different views on certain matters of detail or interpretation.

WJEC regrets that it cannot enter into any discussion or correspondence about this marking scheme.

## WJEC GCSE MATHEMATICS (NEW)

SUMMER 2019 MARK SCHEME

| 5. $\quad(18 \%$ of $£ 256=) 0.18 \times 256$ <br> (Larger share $=) \frac{2 \times 46.08}{3}$ $=(£) 30.72$ <br> (To the nearest $10 \mathrm{p}=)(£) 30.7(0)$ | M1 <br> A1 <br> M1 <br> A1 <br> B1 | Allow (£)46.10 <br> FT 'their stated $18 \%$ '. <br> If M0 allow SC1 for sight of $(£) 15.36$ <br> FT 'their larger share' (not 'their 18\%') and only if rounding required. |
| :---: | :---: | :---: |
| $\left.\begin{array}{l} \text { 5. Alternative method 1 } \\ \text { (Larger share of } £ 256= \\ =(£) 170.66(. .) \end{array} \quad \begin{array}{rl} (18 \% \text { of } £ 170.66=) 0.18 \times 170.66 \\ & =(£) 30.72 \end{array}\right\}$ | M1 <br> A1 <br> M1 <br> A1 <br> B1 | Allow (£)170.70 <br> If MO allow SC1 for sight of (£)85.33. <br> FT 'their stated larger share'. <br> FT 'their 18\%' (not 'their larger share') and only if rounding required. |
|  | M1 A1 $\begin{aligned} & \text { M1 } \\ & A 1 \end{aligned}$ B1 | If M0 allow SC1 for sight of 6(\%). <br> FT 'their derived larger \%'. <br> FT 'their amount' only if rounding required. |
| Accuracy of writing. | OC1 | For OC1, candidates will be expected to: <br> - present their response in a structured way <br> - explain to the reader what they are doing at each step of their response <br> - lay out their explanation and working in a way that is clear and logical <br> - write a conclusion that draws together their results and explains what their answer means <br> For W1, candidates will be expected to: <br> - show all their working <br> - make few, if any, errors in spelling, punctuation and grammar <br> - use correct mathematical form in their working <br> - use appropriate terminology, units, etc |
| 6.(a) $\quad \mathrm{a}(7 \mathrm{~b}+11)$ | B1 | Allow 1a(7b + 11) |
| 6.(b) $\quad \mathrm{x}(\mathrm{x}-8)$ | B1 | Allow 1x(x-8) |
| 6.(c) $8 y-12 y^{2}$ | B2 | Must be an expression for B2. B1 for sight of $8 y$ or $-12 y^{2}$. Mark final answer. |
| $\text { 7.(a) } \quad \begin{aligned} & \\ & =-6 \\ b & =-5 \end{aligned}$ | $\begin{aligned} & \text { B1 } \\ & \text { B1 } \end{aligned}$ | Values may be seen on the diagram. |
| 7.(b) Correct shape in correct position. | B3 | B2 for a correct enlargement in incorrect position. B1 for one correct side in correct position. If no marks allow SC1 for showing all the 'rays' from $(1,2)$. |

| 8. $\quad P($ Alison chooses letter $R$ ) $=2 / 10$ or equivalent. $P($ Sarfraz chooses letter $R)=1 / 4$ or equivalent. <br> Use of $2 / 10 \times 100$ OR $1 / 4 \times 100$ <br> 20 AND 25 clearly implying that Sarfraz is the most likely to choose letter $R$ | B1 <br> B1 <br> M1 <br> A1 | B1 for sight of $2 / 10$ if unambiguously for Alison. B1 for sight of $1 / 4$ if unambiguously for Sarfraz. As probability not asked for, allow e.g. '2 chances in 10' and 'one chance in four'. B1 marks may be implied in subsequent work. Calculation may be done in stages. <br> There is no requirement to tick the box as long as there is no contradiction. <br> Do not accept, on its own, e.g. <br> 'Sarfraz has less letters to choose from' for the A1. |
| :---: | :---: | :---: |
| 8. Alternative method <br> $P($ Alison chooses letter $R)=2 / 10$ or equivalent. <br> $P($ Sarfraz chooses letter $R)=1 / 4$ or equivalent. <br> Attempting to give probabilities in a common format. <br> Correct common format <br> e.g. 4/20 AND 5/20 or 0.2 AND 0.25 clearly implying that Sarfraz is the most likely to choose letter $R$ | B1 <br> B1 <br> M1 <br> A1 | B1 for sight of 2/10 if unambiguously for Alison. B1 for sight of 1/4 if unambiguously for Sarfraz. As probability not asked for, allow <br> e.g. '2 chances in 10' and 'one chance in four' <br> There is no requirement to tick the box as long as there is no contradiction. <br> Do not accept, on its own, e.g. <br> 'Sarfraz has less letters to choose from' for the A1. |
| 9.(a) $3 \mathrm{n}+5$ or equivalent | B2 | B1 for sight of 3n. B0 for $-3 n$ Mark final answer. |
| 9.(b) $3 t=r+8$ or $r+8=3 t$ or $-3 t=-r-8$ $t=\frac{r+8}{3} \quad$ or $\quad \frac{r+8}{3}=t \quad$ or $\quad t=\frac{-r-8}{-3}$ | $\begin{aligned} & \hline \mathrm{B} 1 \\ & \mathrm{~B} 1 \end{aligned}$ | F.T. only from $3 t= \pm r \pm 8$, stated or implied. ( $3 t=r+8$ will have already gained the previous B1.) B 1 B 0 for $-t=\frac{-r-8}{3}$ or equivalent. <br> Mark final answer. <br> Note <br> Allow B1B0 for $t=(r+8) \div 3$ with or without brackets. <br> Allow B1B0 for $\frac{r+8}{3}$ ('t' missing) |
| 9.(c) $6 x+4=46$ OR $3 x+2=23$  <br> $6 x=42$ OR $3 x=21$  <br>   $(x=) 7$  | B2 B1 B1 | B1 for $\quad(x+5)+(2 x-3)+(x+5)+(2 x-3)=46$ or equivalent e.g. $(x+5)+(2 x-3)=23$ <br> FT collection of 'their terms' if of equivalent difficulty. (linear equation only.) <br> FT only from $a x=b$. <br> Allow a fraction from a FT value unless x is a whole number. <br> ( $x=$ ) 7 gains all four marks. <br> Each B mark implies all previous B marks. <br> Mark final answer. |
| 9.(c) Alternative method <br> A trial showing correct values and understanding of perimeter. (e.g. $2(4+5)+2(2 \times 4-3)=28$ ) <br> An improved trial. $(x=) 7$ | $B 1$ $B 1$ $B 2$ | Consistent use of x AND correct evaluation. <br> Dependent on first B1. <br> If $1^{\text {st }}$ trial is using ' 7 ' award B1B1 followed by B1 if left embedded but B2 if shown as $x=7$. <br> B1 for an implied / embedded ' $x=7$ ' but not shown as $x=7$ <br> ( $x=$ ) 7 gains all four marks. <br> Mark final answer. |

10. Intent to square at least two of the three values.

Comparing $(25 \cdot 6)^{2}$ with $(12 \cdot 8)^{2}+(22 \cdot 7)^{2}$ or
Any intent to compare any other relevant values. (e.g. $(25 \cdot 6)^{2}-(22 \cdot 7)^{2}$ with $(12 \cdot 8)^{2}$ or $\left.\sqrt{[ }(12 \cdot 8)^{2}+(22 \cdot 7)^{2}\right]($ with $25 \cdot 6)$ )

Correct evaluation of value(s) to be compared.
( e.g 'sight of 655.36 WITH 679.13' or
'sight of $140 \cdot 07$ WITH 163.84' or
'sight of 26.06 (WITH 25•6)' )
Statement that it is NOT possible
10. Alternative method 1

Intent to use two right-angled trig ratios using 2
different pairs of given sides

Correct right-angled trig ratio used twice, using 2 different given sides, in order to compare

- the values of the same angle or
- the sum of the two angles with $90^{\circ}$.

Correct evaluation of value(s) to be compared. e.g. sight of any two of $30\left({ }^{\circ}\right), 27.5 \ldots\left({ }^{\circ}\right)$ and 29.4...( ${ }^{\circ}$ ) OR sight of $30\left({ }^{\circ}\right)$ and $60.58 \ldots\left(^{\circ}\right)$ (and the sum to be compared with $90^{\circ}$ )

$(\cos A=)\left(12.8^{2}+22.7^{2}-25.6^{2}\right) /(2 \times 12.8 \times 22.7)$ (= $2377 / 58112$ or $0 \cdot 0409 .$.

$$
(A=) 87\left(.6557 \ldots{ }^{\circ}\right)
$$

Statement that it is NOT possible

|  |  |
| :--- | :--- |
| 11.(a) $\quad A \cap B$ | $B$ |
| 11.(b) $\quad B^{\mathrm{I}} \quad$ | B |

Four numbers with a range of 10.
Four numbers with a total of 36.
Four numbers with a median of 8.
Possible answers for all three marks are
$5,5,11,15$ or $5,6,10,15$ or $5,7,9,15$ or $5,8,8,15$

## A1

A1
B1

B1
B1

## B1

B1

S1 (Note:
$12 \cdot 8^{2}=163 \cdot 84,22 \cdot 7^{2}=515 \cdot 29$ and $25 \cdot 6^{2}=655 \cdot 36$ )
M1 The comparison attempted must show both intended calculations e.g. $(25 \cdot 6)^{2}$ AND $(12 \cdot 8)^{2}+(22 \cdot 7)^{2}$ unless intention is to compare with a given side e.g. $\sqrt{ }\left[(12 \cdot 8)^{2}+(22 \cdot 7)^{2}\right]$ with $25 \cdot 6$

A1 C.A.O. but allow evaluated answers to be given to the nearest whole number. e.g. 655 WITH 679.

A1 Allow FT if M1 awarded.
If all marks gained ISW.
S1 i.e. In order to find the value of either the same angle OR two different angles, whilst sufficient to show that it isn't a right-angled triangle.

1 CAO
CAO

| Ratio | Opp | Adj | Hyp | Angle |
| :---: | :--- | :--- | :--- | :--- |
| Sin | 12.8 |  | 25.6 | $30\left({ }^{\circ}\right)$ |
| $\operatorname{Cos}$ |  | 22.7 | 25.6 | $27.5 \ldots\left(^{\circ}\right)$ |
| Tan | 12.8 | 22.7 |  | $29.4 \ldots\left(^{\circ}\right)$ |
| Sin | 22.7 |  | 25.6 | $62.46 \ldots\left(^{\circ}\right)$ |
| $\operatorname{Cos}$ |  | 12.8 | 25.6 | $60\left({ }^{\circ}\right)$ |
| Tan | 22.7 | 12.8 |  | $60.58 \ldots\left({ }^{\circ}\right)$ |

A1 If comparing the sum of two angles (with $90^{\circ}$ ), the sum must be shown.
Allow FT if M1 awarded.
If all marks gained ISW.
NOTE The cosine rule is not on the intermediate tier specification, but as it is a common question, it may be seen by Higher tier candidates.
M2 M1 for $25.6^{2}=12.8^{2}+22.7^{2}-2 \times 12.8 \times 22.7 \times \cos A$

If all marks gained ISW.

B0 if all four original numbers used.

\begin{tabular}{|c|c|c|}
\hline \begin{tabular}{l}
13. (number of females in Porth \(=\frac{90}{360} \times 128\) \\
OR (number of males in Porth \(=\) ) \(\frac{120}{360} \times 72\) \\
(number of females in Porth =) 32 (number of males in Porth =) 24 \\
(Probability from Porth \(=) \frac{56}{200}\) or equivalent ISW
